NEWS RELEASE

GCCP RESOURCES TO SUPPLY CALCIUM CARBONATE TO LHOIST GROUP

Singapore, 7 July 2015 – Malaysia-based crushed calcium carbonate producer, GCCP Resources Limited (沛盛创投有限公司; “GCCP” or the “Group”) has secured a contract from Lhoist SPN Sdn Bhd (“Lhoist”), the Malaysian subsidiary of Lhoist Group, for the supply of crushed calcium carbonate over a period of 13 months commencing July 2015.

The Lhoist Group is a Belgium-headquartered global producer of lime, dolime and minerals, with operations in 25 countries in Asia, including Malaysia, North and South Americas and Europe. Lhoist develops mineral and lime-based products for environmental applications and use in the steel, chemical, paper and other industries. The contract with GCCP will see the latter supplying to Lhoist a total of 60,000 metric tons of precipitated calcium carbonate grade (PCC-grade) calcium carbonate that are finely crushed to between 30 and 50 millimetres in size over the contract period.

Mr Alex Loo, Chairman and CEO of GCCP said, “This partnership with Lhoist Group, one of the world’s leading lime producers, bears testimony to the quality of our calcium carbonate reserves.”

In addition to the Lhoist contract, GCCP has also marked its first cooperation with a foreign customer as it entered into an agreement to supply an Indonesian pulp and paper company with an initial 5,000 metric tons of crushed calcium carbonate. More orders are expected to follow, subject to confirmation that the quality of the product supplied matches the requirements of the customer.

GCCP’s plant at its Gridland Quarry is currently able to crush about 40,000 tons of PCC-grade crushed calcium carbonate per month, or about 400 tons per hour. The Group is also in the midst of constructing a crushing plant and a powder production plant at its Hyper Act Quarry for the production of high-grade ground calcium carbonate. Piling work at the two

plants has been completed, while construction and assembly work for the crushing plant has commenced. Based on the progress, the crushing plant and the powder production plant are expected to be commissioned on schedule by the fourth quarter of 2015 and the first quarter of 2016 respectively.

About GCCP Resources Limited

GCCP Resources Limited is primarily engaged in the quarrying and the processing of calcium carbonate in Malaysia. The Group owns one of the biggest ground calcium carbonate (“GCC”) grade calcium carbonate reserves in Malaysia through its Hyper Act Quarry. The Group’s quarries, namely Gridland Quarry and Hyper Act Quarry, collectively hold about 186 million tons of precipitated calcium carbonate (“PCC”) and GCC-grade calcium carbonate resources and 26 million tons of PCC and GCC-grade calcium carbonate reserves.
